ELSEVIER

Journal of Membrane Science 121 (1996) 277–278

journal of MEMBRANE SCIENCE

Contents

Acknowledgement to the Referees 1

Approximate modeling of spiral-wound gas permeators
R. Qi and M.A. Henson (Baton Rouge, LA, USA) 11
Osmotic evaporation through macroporous hydrophobic membranes: a survey of current research and applications
W. Kunz, A. Benhabiles and R. Ben-Aïm (Compiègne, France) 25
Diffusion induced phase separation with crystallizable nylons. I. Mass transfer processes for nylon 4,6
A.M.W. Bulte, M.H.V. Mulder, C.A. Smolders and H. Strathmann (Enschede, The Netherlands) 37
Diffusion induced phase separation with crystallizable nylons. II. Relation to final membrane morphology
A.M.W. Bulte, M.H.V. Mulder, C.A. Smolders and H. Strathmann (Enschede, The Netherlands) 51
Coagulation-crossflow microfiltration of domestic wastewater
M.H. Al-Malack (Dhahran, Saudi Arabia) and G.K. Anderson (Newcastle upon Tyne, UK) 59
Preparation and investigation of chemically modified porous polyamide ultrafiltration membranes
J. Hosch and E. Staude (Essen, Germany) 71
Membrane distillation: theory and experiments
P. Godino, L. Peña and J.I. Mengual (Madrid, Spain) 83
Engineering for high pressure reverse osmosis
R. Günther, B. Perschall, D. Reese and J. Hapke (Hamburg, Germany) 95
Retrofiltration rates in high-flux hollow fiber hemodialyzers: analysis of clinical data
A. Wüpper, D. Woermann, F. Dellanna and C. A. Baldamus (Köln, Germany) 109
Solubility and polarity parameters for assessing pervaporation and sorption properties. A critical comparison for ternary systems alcohol/ether/polyurethaneimide
A. Jonquières, D. Roizard, J. Cuny and P. Lochon (Nancy, France) 117

Meetings calendar 135

Transport of metal ions through cation exchange membranes containing episulfide (or thiol) groups and/or triethylenetetramine side chains
T. Nonaka and S. Takeda (Kumamoto-shi, Japan) 137
Formation of an externally unskinned polysulfone capillary membrane
E.P. Jacobs (Stellenbosch, South Africa) and W.D. Leukes (Grahamstown, South Africa) 149
Recovery of silver nitrate by transport across a liquid membrane containing dicyclohexano 18 crown 6 as a carrier
A. El Bachiri (d'Oujda, Morocco), A. Hagège and M. Burgard (Strasbourg, France) 159
A novel automated method for the determination of membrane permeability in gas–liquid transfer applications
A. Campbell Ritchie, K. Bowry, A.C. Fisher and J.D.S. Gaylor (Glasgow, UK) 169
Gas sparging to enhance permeate flux in ultrafiltration using hollow fibre membranes
S.R. Bellara, Z.F. Cui (Oxford, UK) and D.S. Pepper (Edinburgh, UK) 175
Ultrafiltration membranes prepared from crystalline bacterial cell surface layers as model systems for studying the influence of surface properties on protein adsorption
S. Weigert and M. Sára (Wien, Austria) 185
Permeation and separation properties of polyimide membranes to olefins and paraffins
K. Tanaka, A. Taguchi, J. Hao, H. Kita and K. Okamoto (Yamaguchi, Japan) 197
Effect of skin layer surface structures on the flux behaviour of RO membranes
M. Hirose, H. Ito and Y. Kamiyama (Shiga, Japan) 209

Significance of duration and amplitude in transmembrane pressure pulsed ultrafiltration of binary protein mixtures
C. Wilharm and V.G.J. Rodgers (Iowa City, IA, USA) 217
Modeling of concentration polarization and depolarization with high-frequency backpulsing
S. Redkar, V. Kuberkar and R.H. Davis (Boulder, CO, USA) 229
Synthesis and gas permeation properties of poly(4-methyl-2-pentyne)
A. Morisato and I. Pinnau (Menlo Park, CA, USA) 243
The effect of gas molecule affinities on CO_2 separation from the CO_2/N_2 gas mixture using inorganic membranes as investigated by molecular dynamics simulation
H. Takaba, K. Mizukami, M. Kubo, A. Stirling and A. Miyamoto (Sendai, Japan) 251
Nonlinear theory for ionic transport through track-etched nuclear membranes
Z.J. Grzywna, Z. Siwy (Gliwice, Poland) and C.L. Bashford (London, UK) 261
